The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	orrespondence address				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1) Responsive to communication(s) filed on 12 Oc	ctober 2003.					
,						
3) Since this application is in condition for allowar	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is					
closed in accordance with the practice under E	closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.					
Disposition of Claims						
4)⊠ Claim(s) <u>1-7</u> is/are pending in the application.						
•	4a) Of the above claim(s) is/are withdrawn from consideration.					
5) Claim(s) is/are allowed.						
6)⊠ Claim(s) <u>1-7</u> is/are rejected.						
7) Claim(s) is/are objected to						
	3) Claim(s) are subject to restriction and/or election requirement.					
Application Papers						
9) The specification is objected to by the Examiner. 10) The drawing(s) filed on 12 October 2003 is/are: a) accepted or b □ objected to by the Examiner.						
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).						
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).						
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.						
Priority under 35 U.S.C. § 119		·				
12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of:						
a) ☐ All b) ☐ Some c) ☐ None of. 1. ☐ Certified copies of the priority documents have been received.						
2. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No						
3. Copies of the certified copies of the priority documents have been received in this National Stage						
application from the International Bureau (PCT Rule 17.2(a)).						
* See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 2136

DETAILED ACTION

1. Claims 1-7 are pending and have been examined.

Information Disclosure Statement

2. It is noted that an Information Disclosure Statement has not been filed on this application.

Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 4. Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. A centralized server farm has not been disclosed or described in the specification. The specification is only directed to <u>a</u> centralized authentication server.
- 5. Claim 3 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Network fingerprint sensors relying on the centralized server for functional operations has not been disclosed or described in the specification. The

Application/Control Number: 10/605,600

Art Unit: 2136

specification is only directed to sensors comprising a fingerprint capture subsystem and a network communication subsystem, clearly functional operations.

- The following is a quotation of the second paragraph of 35 U.S.C. 112:

 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 7. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 2, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 9. Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Klinger et al. (US Patent Application Publication 2004/0128519, hereinafter Klinger).

Regarding claim 1, Klinger teaches a network fingerprint authentication system which comprising (abstract):

Application/Control Number: 10/605,600

Art Unit: 2136

- a) multiple, remote, network connected network fingerprint sensors (fig. 3),
- b) a centralized server farm, operable to communicate with the network fingerprint sensors, and including a plurality of computer servers, each of which can simultaneously control, optimize, obtain fingerprint data, analyze fingerprint data, authenticate and verify the identities of the fingerprints for multiple remote network connected fingerprint sensors (paragraphs 43-44), and
- c) a communication network utilizing the TCP/IP (Transmission Control Protocol/Internet Protocol) protocol suite utilized by elements (a) and (b) above for communication (paragraphs 37-41).

Regarding claim 2, Klinger teaches wherein the communication network can also be a wireless network protocol such as 802.11x, or BlueTooth (paragraphs 32-35).

Regarding claim 3, Klinger teaches wherein the network fingerprint sensors rely on the centralized server for functional operations (paragraphs 43-45).

Regarding claim 4, Klinger teaches wherein the network fingerprint sensor is comprised of a fingerprint capture subsystem and a network communication subsystem (fig. 2).

Regarding claim 5, Klinger teaches wherein the network fingerprint sensors include elements for performing a serial or parallel to Ethernet (IEEE 802.3), or wireless bridging function (paragraphs 32-35).

Regarding claim 6, Klinger teaches in which there is no physical connection to a computer (paragraphs 32-35).

Application/Control Number: 10/605,600 Page 5

Art Unit: 2136

Regarding claim 7, Klinger teaches in which the network fingerprint sensor captures fingerprint data and sends it to the authentication server via a network (paragraphs 43-44).

Art Unit: 2136

Conclusion

- 10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David G. Cervetti whose telephone number is (571) 272-5861. The examiner can normally be reached on Monday-Friday 7:00 am 5:00 pm, off on Wednesday.
- 11. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nasser G. Moazzami can be reached on (571) 272-4195. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
- 12. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
